We help to eliminate your worries and concerns about technology.

Our Company was established in the year 1998. We have survived the ups and downs of the economy, so we understand that most

homes and businesses are not in a position to spend more money than they can afford. That's why we have employed dedicated specialists with at least 15 years experience in the technical field to make sure all of your questions are answered. Our motto is that "We will not let you spend more money than what you have to". With our one-on-one consultations, we will remove the worries of your information technology concerns by custom fitting your office workstations, applications, Networks - or build on to your existing network with little to no downtime for your business. We are dedicated in helping homes and business grow in the technology world.

Services

We troubleshoot, diagnose, build, service, network, maintain and repair all IBM compatible PC hardware & software, including all Windows systems, Linux, and Novell Servers. Services include:

- **Hardware Repair & Service**
- **Hardware Upgrades**
- **Virus Detection & Removal**
- **Custom Built Servers & Computers**
- **Operating System Optimization**
- **Home Networking**
- **Wireless Networking**
- **Software Installations & Upgrades**
- **Network Design**
- **Network Implementation & Support**
- **New System Setup**
- **Preventative Maintenance**
- **On-site Training and Support (on most Windows based software)**
- **Custom Built Software**
- **Corporate VPN setup**
- **Remote Access to home or business**
- **And many more - call or write us.**

We are here to help you understand technology.

Networking

Sharing information between different computers in your home and/or Business has become a way of life for businesses. However, the use and implementation of networks is both expensive and requires a level of knowledge that most companies cannot easily afford.

Our solution — We can implement a network for you or maintain your existing network. It is not necessary for networking to be expensive, time consuming or difficult. Our custom built network is designed so that it can grow with your company.

Custom Built Servers & Computers

You can buy a packaged computer in a box from almost anyone, but, is it tailored to your needs? Is it made with reliable parts? Will it perform to your specifications? Will the seller support it quickly when service is required? With NBS Technology, quality comes before quantity. We build our systems with parts that are hand picked and selected for reliability, durability, and performance. All our systems are set up so that you can upgrade as needed.
